IZZI Business Services

Company Profile

IZZIBS at a Glance

- **Established Expertise:** A trusted operational technology and consulting service provider delivering best-in-class solutions since 2016.
- **Industry Focus:** Specialized in serving manufacturing industries, with a deep, dedicated focus on the global Energy, Refinery, and Petrochemical sectors.
- **Core Domains:** Comprehensive expertise spanning Planning & Optimization, Scheduling & Blending, Process Optimization, Process Simulation, Production Accounting, Offsite Management and Digitalization.
- **Proven Delivery:** Successfully delivered 20+ turnkey implementation and support projects globally.
- **Strategic Consulting:** Executed 25+ high-impact consulting assignments to elevate business processes and model utilization.
- **Global Footprint:** Headquartered in India, supporting a rapidly expanding client base across all global continents.
- **Driven by Integrity:** Operating firmly on the pillars of strong moral values and ethical business practices.

Service Domains

Our services

Implementation

We provide operational technology implementation services to build models for clients with industry best standards. We also provide integration services for seamless data flow across various business applications.

Consulting

We provide technical and project management consulting services to our clients to elevate their business processes and model utilizations to align with industry best practices.

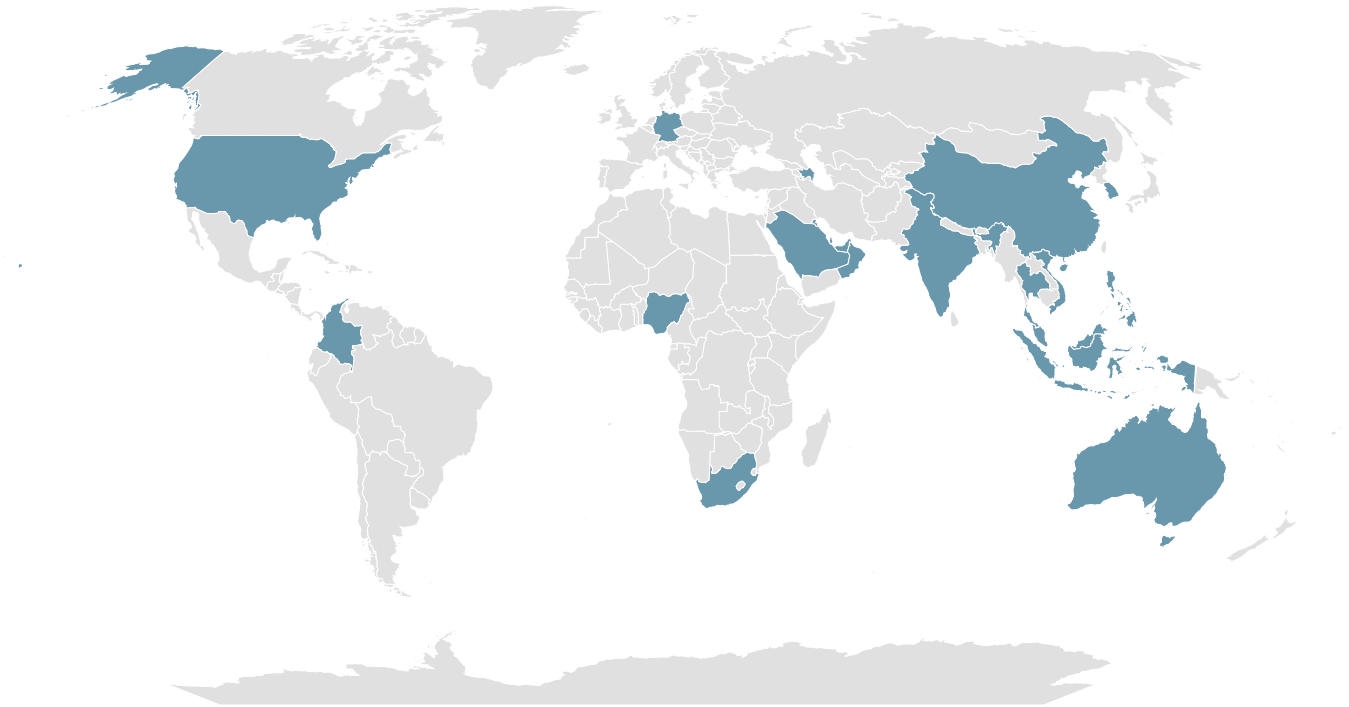
Support

We provide continuous and need based support services to our clients, to ensure maximum benefits are achieved by effective utilizations of existing systems.

Training

We provide standard and customized training programs for business processes and applications, in line with client requirements.

Global Delivery Experience



South and East Asia

- India
- China
- Singapore
- South Korea
- Thailand
- Vietnam
- Malaysia
- Indonesia
- Philippines

Central and West Asia

- Saudi Arabia
- UAE
- Oman
- Qatar
- Kuwait
- Azerbaijan

Americas

- USA
- Colombia

Europe & Africa

- South Africa
- Nigeria
- Germany

Australia

- Australia

Trusted by Global Industry Leaders

DANGOTE

LP based Planning and Crude assay

- Build, review and update LP models for single-plant, multi-plant & multi-period
- Model conversion from one LP tool to another
- Planning process and LP model trainings
- Unit configuration studies for refinery / Petrochem
- Crude assay synthesis or updates using lab data
- Crude tower tuning using distillation data
- Crude assay integration - planning and scheduling models
- Crude net back value calculations

Technologies

- AVEVA USC Plan
- Aspen PIMS
- Aspen Unified PIMS
- Haverly GRTMPS
- AVEVA USC Assay
- AVEVA ECKM
- Haverly H/CAMS

Scheduling and Blending

- Build, review and update scheduling & blending optimization models for refinery and petrochemicals
- Logistics scheduling
- Short-term and long-term scheduling business process
- Data integration with required business applications for seamless work process
- Scheduling, logistics & blend optimization training

Technologies

- AVEVA USC Schedule
- Aspen Unified Scheduling
- APS (Orion) and MBO
- Aspen PS (Plant Scheduler)
- Custom Excel based scheduling models

Process Optimization (MES)

- Real Time Process Optimization with Equation-Based Models
- Scalable and Maintainable Optimization Solution
- Automated Optimization and Reporting
- Integrates heat and material balance rigorous simulation, data reconciliation, gross error detection, economic optimization, and performance monitoring into a single user environment
- Results Visualisation and Key Performance Indicators

Technologies

- ROMeo Process Optimization
- LP based enterprise-wide optimization

Production Accounting & Offsite Management (MIS)

- **Production accounting**
  - Data integration with production systems such as oil movements, LIMS, ERPs and web based manual forms
  - Production accounting / reconciliation
  - Customized reporting
- **Oil movement**
  - Production tracking, monitoring, trending, controlling and analyzing oil movements
  - Integration with scheduling and production accounting

Technologies

- AVEVA Production Accounting (APO)
- Belsim Vali
- Aspen AORA
- Aspen AURA
- Aspen ATOMS

Process Modelling and Simulation

- Build, review and update rigorous steady state process simulation model
- LP vectors generation for LP models
- Re-calibration of rigorous steady state simulation models
- Facilitating and conducting test runs

Technologies

- Aspen Hysys
- Aspen Plus
- KBC Petro Sim

Digitalization & Integration

- Centralized data management system
- IT-OT application data integration
- Enterprise application architecture design
- Process data historian and analytics
- Dashboards - Self-service, interactive & role-based
- Reports automation - on-demand & auto-generated
- KPIs, notifications & asset performance management
- Digital logbook - operations & maintenance

Technologies

- AVEVA PI & PI Vision
- Aspen Inmation
- Aspen InfoPlus.21
- JaajiTech - inSis Suite
- Custom Data integration

Process & Business Consulting Services

- Conduct profitability studies to enhance process efficiency
- Optimize process unit operations and key parameters
- Upgrade low-value streams to higher-value products by identifying stream Re-routing opportunities
- Explore & evaluate new intermediate processing feasibility
- Assess and evaluate feasibility of new crude processing
- Minimize Quality Giveaway
- Identify bottlenecks and solutions to de-constrain

25+ Consulting Engagements with McKinsey

25+ High-Impact Consulting Services Engagements

Major Global Regions Covered

Focus: Profitability, Unit Optimization, and Value Creation

South-East Asia:

10+ Engagements (Major Refineries & Oil Majors)

Middle East & Western Asia:

7+ Engagements

South Asia:

5+ Engagements

East Asia & Australia:

2 Engagements

Americas (South America):

1 Engagement

The IZZIBS Advantage

- **End-to-End Solutions:** Comprehensive lifecycle services covering business process consulting, rigorous model implementation, customized training, and continuous support.
- **Versatile Technology Command:** Deep, hands-on proficiency across industry-leading platforms including AVEVA, AspenTech, KBC, and digitalization suites like Jaajitech.
- **Trusted by Industry Leaders:** A proven track record delivering complex, multi-site optimization projects for global oil majors like ADNOC, Shell, and IOCL.
- **Strategic Partnerships:** A recognized and trusted delivery partner collaborating seamlessly with global consulting leaders such as AVEVA, Shell, McKinsey & Company, and Wipro.
- **Certified Domain Experts:** A dedicated team of certified & experienced professionals deploying solutions aligned with the highest industry best standards.
- **Flexible Engagement Models:** Offering continuous and need-based services in both turnkey basis or on T&M basis to optimize your service costs and maximize system benefits.
